Re: Nicolas Douillet

I am happy to confirm that Nicolas Douillet consulted as a 3D researcher with us and our partners for over six months up to June 30th 2019.

During that period Nicolas worked in partnership with our team starting from our proprietary point cloud avatar in order to develop:

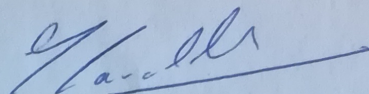

- a functional mesh
- metrology solutions
- compiled algorithms linking with our Web app.

Nicolas' contribution will remain a milestone in the start of our group 's 3D research and we thank him for his work. He has demonstrated excellent 3D technological skills, architecture, coding documentation and compilation capabilities, and a passion for detail during this challenging assignment.

Feel free to connect should you want additional feedback.

Clement Lavallard, Chief Executive Officer
